Subject: Urgent: Railroad crossing closing in Talbot, Macon, Dooly and Crisp Co, GA- Fitz
Attachments: Fitzgerald Mega- public.xlsx

Good evening,

As many of you know we handle the traffic control for CSX. CSX is starting another "Mega" project on or around Jan 14. Just like at the beginning of last year CSX will have anywhere from 5 to 7 teams working from Woodland, GA to Waycross, GA.

Due to the magnitude of this job, and the number of teams starting in various places on the track, and the unpredictable variables with this type of work leaves our ability to predict the closure down to a "date" virtually impossible.

I have attached a spreadsheet with the expected close dates for your crossing that will be getting worked. The reality is, we should prepare citizens and motorist for these roads to be closed "on/around" meaning days prior or days later.

As always, I apologize for the inconvenience. We always do our best to calculate dates and get this information out as quickly as possible, but at this point, I believe calculating dates and not achieving them will create more chaos and confusion that if we just prepare for the closures close to the dates I provided.

If you have any questions, you may reach out to me directly. Understand my answers are very limited and I have given everyone all of the information that

I have at this current time. If any more becomes available to me, I will definitely let everyone know. r

If I have left anyone off of this chain email please let me know and I will be happy to add them.

Thank you,

Angela D Nelis, RT (R)(CT)
